Jalan Dero, Dero, Condongcatur, Kec. Depok, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55281

I am an Information Systems student at Universitas Amikom Yogyakarta with a keen interest in Web Development, particularly in backend development. I have served as the IT Department Coordinator in AMCC (Amikom Computer Club) and as a Practicum Assistant for two semesters. These roles have honed my leadership skills and deepened my technical expertise.

In my web development projects, I utilize a variety of advanced technologies such as Tailwind for responsive design, Laravel for robust PHP framework development, ReactJS for dynamic front-end interfaces, and ExpressJS for efficient server-side development. This blend of practical experience and technical proficiency has equipped me with the skills needed to excel in the fast-paced and ever-evolving field of information technology.
